

IMMUNE SYSTEM MOBILIZATION PROCESS

With thanks to Ligia Barascout, Batinah Dawdy, and Glenn Soberman

To help in the healing of conditions affected by immune system response

A. PREPARATION

1. MT for ND, D, and R and correct if necessary.
2. SAY to your client: "Please invent a brief phrase to describe your condition so we can use it in our work today, e.g., "my sinus infection," or "my pre-cancerous cervical cells." Make note of the phrase.
3. MT: "My being is ready, willing, and able to prevent or treat my (repeat client's phrase) now." If weak do other work.
4. REVERSALS AND MINI-REVERSALS: TREAT at least the following reversals, where necessary, by treating the Originating Traumas that caused them.
 - a. My body is incapable of healing itself.
 - b. My immune system is incapable of healing my (client's phrase) without prescription drugs.
 - c. My Center is incapable of healing my body of its (client's phrase).
 - d. My immune system is too weak to kill my (client's phrase) COMPLETELY.

- e. I can only get well if someone else and/or something else does it for me.
- f. I'm too sick to be healed COMPLETELY.
- g. I'm too messed up to heal myself.
- h. It's impossible for anyone to heal themselves
- i. MT: "There are more reversals to my healing my (client's phrase)." If strong, consider the nature of your client and their health issue and, in cooperation, discover, MT, and treat more relevant reversals and mini-reversals that may be impeding self-healing. (Consider secondary gain.)

5. IMMUNE SYSTEM DIAGNOSIS: MT about the workings of the immune system considering at least the following:

- a. "My body has enough red blood cells to bring oxygen and nutrition to the area affected by my (client's phrase)." If weak, explore at least issues of sufficiency, poverty, deprivation, and neglect.
- b. "My red blood cells are easily bringing oxygen and nutrition to the areas of my body affected by my (client's phrase)." If weak, consider at least issues of nurture, generosity, and blockage.
- c. "My body has enough white blood cells to heal my (client's phrase)." If weak, consider at least protection and survival issues.

- d. "My body has enough platelets to heal my (client's phrase)." If weak, consider at least healing, protection, and clotting issues.
- e. "My immune system easily recognizes the (microbe, cancer) that is invading my (name affected body parts or entire body) as something it must destroy." If weak, consider at least consciousness, insight, denial, and idealization issues.
- f. "My leucocytes have already located the invading (microbes, cancer cells)." If weak, consider at least assertion, insight, location, and discovery issues.
- g. "My leucocytes are easily engulfing and killing the invading (microbes, cancer cells)." If weak, consider at least assertion, aggression, and completion issues.
- h. "My red blood cells, kidneys, and colon are removing the toxic leftovers of my (client's phrase)." If weak, consider at least issues of rejection and letting go.
- i. "My killer cells are easily recognizing the difference between my body's own tissues and invading (microbes, cancer cells)." If weak, consider at least issues of consciousness, denial, insight, and differentiation.
- j. "My killer cells are easily attacking and killing only (microbes, cancer cells) and not my body's own tissues." If weak, consider at least issues of protection, differentiation, taking care of business, completion, deserving.
- k. "My killer cells are not attacking my own tissues in my (name area in body where problem is)." If weak, consider at least issues of self-hatred, self-punishment, suicidality, and differentiation.

- l. “My phagocytes are easily chewing up all the invading organisms.” If weak, consider at least issues of passivity, protection, and survival.”
- m. “My lymphocytes are remembering these microbes as previous invaders, since they are.” If weak, consider at least issues of repression, memory, unconsciousness, and dissociation.
- n. “My antibodies are easily locking onto antigens, neutralizing toxins, and activating complement.” If weak, consider at least issues of passivity, protection, and survival.
- o. “My T-lymphocytes are destroying invaders and antigens.” If weak, consider at least issues of protection, aggression, assertion, and survival.
- p. Other relevant immune system issues.

6. DISCOVERING UNDERLYING IMMUNE SYSTEM TRAUMAS: For each immune system issue that MT weak above, discover the Originating, Initiating, and Connecting Traumas and/or traumatic patterns that underlie the issue. Make a list of these traumas and patterns including the issues that MT weak.

7. DISCOVERING OTHER RELEVANT TRAUMAS:

- a. SPIRIT: “Spiritual trauma is blocking my Center from helping heal my body.” If Strong, discuss and MT to discover the relevant spiritual Originating, Initiating, and Connecting traumas and patterns. Add the patterns and traumas to your list for later treatment.

- b. PSYCHE: “Psychological trauma is blocking certain body parts or processes from healing (client’s phrase).” If strong, discuss and MT to discover the relevant psychological traumatic patterns and Originating, Initiating, and Connecting traumas. Add these to your list of traumas and patterns for later treatment.

- c. BODY: “Physical trauma is blocking certain body parts or processes from healing my (client’s phrase).” If strong, discuss and MT to discover the relevant physical traumatic patterns and Originating, Initiating, and Connecting traumas. Add these to your list of traumas and patterns for later treatment.

8. DISCOVERING ARCHETYPAL INVOLVEMENT:

- a. MT: “There is at least one archetype that is involved in my (client’s phrase).”
 - i. If weak, go to step 9 below.
 - ii. If strong, discuss and MT to find out which archetype is involved.
 - iii. Use the Depths materials and MT to find out what the archetype is doing to make or keep your client sick.

Note: There will not necessarily be traumas to treat on all three levels.

9. OPTIMAL ORDER OF TREATMENT: By now you will have a treatment list that consists of a group of traumas and patterns for each type of dysfunction you have discovered. MT to find the optimal order of treatment of the groups of traumas.

10. VIALS/PAPERS: “We need to use vials and/or papers to treat my (client’s phrase).” If strong, MT vials and/or papers that include:

- a. All the relevant body parts, including organs, immune system parts if relevant, organ systems, nervous system parts, etc.. Include relevant parts of the body parts being treated, e.g., for the lungs, alveoli and bronchii.
- b. All the relevant diseases or bodily dysfunctions, e.g., breast cancer, kidney infection, or asthma.
- c. All relevant microbes, parasites, or types of cancer cell, e.g., streptococcus sanguis, lung flukes, or sarcoma.
- d. Any other contributing substance, e.g., toxic chemicals or toxic heavy metals.
- e. Any relevant allergies or sensitivities, e.g., dust, mold.

TREATMENT

11.REVERSALS: Treat all the reversals discovered in #4 above with the Core Belief Protocol using the Trauma Treatment Option.

12.ARCHETYPES: Using AIT Depths work:

- a. Have your client do active imagination during which they obtain the archetype's agreement to join in the treatment of your client's illness.
- b. Have the archetype(s) participate in your client's energy treatment.
- c. Treat the archetype(s) for its involvement in your client's illness.

13.3-STEP TRANSFORMATION: USING 3-Step Transformation in the optimal order discovered in #9 above, treat all the relevant traumatic patterns and Originating, Initiating, and Connecting traumas using the Trauma Protocol, the Family Treatment Protocol, Quick AIT, or Instantaneous AIT.

- a. When using vials or papers, add them before treatment begins, and treat at least three traumas, aspects, or patterns before removing, retesting, and replacing vials and/or papers with new ones. If the physical dysfunction is serious, treat more than three traumas, aspects, or patterns before removing, retesting, and replacing vials or papers.

- b. Use the part of the body most affected by the illness as the place for the Stationary Hand during treatments, e.g., place the stationary hand on the sinuses if you are treating sinusitis, or on the stomach for a stomach ulcer.

- c. For particular symptoms such as pain, itching, soreness, or stiffness, treat each symptom as an aspect to a SUD of 0, placing the stationary hand on the painful, sore, itchy, or stiff part.

14.CREATE AND TREAT A MATRIX: MT: “We need to create and treat a Core Belief Matrix in order to complete this work on my (client’s phrase).” If strong, do so; if weak, continue below.

15.REAWAKEN A CORE QUALITY: MT: “We need to reawaken at least one Core Quality in order to complete the healing of my (client’s phrase). If strong, do so; if weak, continue below.

16.HALLELUJAH!!
